SURAJ BALASAHEB KHANASE

B.Tech CSE (Data Science) Student | AI/LLM Application Developer

Pune, Maharashtra, India | surajkhanse@gmail.com | +91 86230 94886 | linkedin.com/in/suraj-khanase-25a429378

github.com/cyber-suraj | devpost.com/surajkhanse

SUMMARY

B.Tech CSE (Data Science) student with hands-on experience building LLM-powered applications, including a Retrieval-Augmented Generation (RAG) agent and a full-stack fintech platform built at a hackathon. Comfortable across the AI application stack — LangChain/LangGraph, vector databases, and API-based LLM integration — and actively seeking internship opportunities in AI/ML or software development.

EDUCATION

B.Tech in Computer Science (Data Science) *Expected 2029*
Ajeenkya D Y Patil University (ADYPU), in academic collaboration with NxtWave Institute of Advanced Technologies (NIAT) | Pune, India

HSC (12th), Science *2023 – 2025 | 65%*
New English School & Jr. College of Science, Parner

SSC (10th) *2023 | 83%*
Anchaleshwar Vidyalay, Ganjibhoyare

PROJECTS

BankConnect Pro — Real-Time Digital Banking Platform *Python, React, Database | Hackathon Project*

- Built a real-time platform connecting bank customers and staff for loan applications, document uploads, and application tracking.
- Implemented role-based access control so staff can verify documents, flag fraud indicators, and manage tasks without exposing customer data across roles.
- Presented the project on Devpost as a submitted hackathon build, covering both the customer-facing and staff-facing workflows end to end.

RAG Agent — Document Q&A System *LangChain, LangGraph, ChromaDB, HuggingFace Embeddings, Gemini*

- Built an AI agent that answers natural-language questions over uploaded documents using a Retrieval-Augmented Generation pipeline.
- Redesigned the system from a single-pass Q&A script into a multi-step LangGraph agent, improving its ability to reason across retrieval steps before answering.
- Used ChromaDB for vector storage and HuggingFace embeddings to power semantic search over document chunks.

AI Smart Recipe Generator *Groq API, LLaMA, Gradio*

- Developed an AI application that generates recipes in real time from user-provided ingredients using a Groq-hosted LLaMA model.
- Designed an interactive Gradio interface for live input and output, and documented the build in a formal project report as part of an LLM applications course.

LEADERSHIP & EXPERIENCE

Google Student Ambassador *2026*

- Represent Google on campus, leading student-facing AI activities and engagement sessions.
- Promote Gemini and Google's AI tools to fellow students through hands-on sessions and outreach.

SKILLS

Languages: Python, C++
AI/LLM Tools: LangChain, LangGraph, ChromaDB, HuggingFace, Gemini API, Groq API
Web & Tools: React, HTML/CSS, JavaScript, Gradio, Git/GitHub, VS Code, Google Colab
Core CS: Data Structures & Algorithms (STL, complexity analysis), MySQL

CERTIFICATIONS & ACHIEVEMENTS

- Deloitte Technology Job Simulation (Forage) — completed a simulated coding and development engagement.
- HP "AI for Business" — certified in applied AI use cases for business contexts.
- Hackathon participant: HackShastra, OpenAI x NxtWave AI Buildathon, Base44 x NxtWave Workshop, and a UI/UX design challenge.
